

# Bags of Hope

This pattern is designed to help you create durable cloth bags for foster children who have no other way to carry their belongings. Invite your friends to join you, and donate the bags to churches and charity organizations who provide aid to these young people.

This bag is single fabric on each side. If fabric is light, make two bags and put one inside the other, joining at the top fold, or double fabric before sewing.

Attach a large safety pin to the end of the cord and pull through the top. Leave loop of cord at one end and make a knot on each cord at the other end.
